To complete your Azure registration and fully activate your environment, you will move through a registration phase, identity verification, agreement acceptance, and an initial setup phase.

Phase 1: Registration and Profile Setup

- **Navigate to the page**: Open your web browser and go to ://microsoft.com.
- **Select the offer**: Click the **Start free** button to claim your $200 credit and 12 months of free services.
- **Authenticate identity**: Enter your Microsoft email (Outlook, Hotmail, Live), or select **Sign in with GitHub**.
- **Create credentials**: Click **Create one!** if you lack an existing account and follow the prompts to establish a password.
- **Fill profile data**: Select your country, enter your legal first and last name, and type your email address.
- **Identify company status**: Enter your own name or "Individual" in the **Organization / Company** text box if you are a personal user.

Phase 2: Dual Verification Process

- **Select country code**: Choose your country's dialing code from the dropdown menu in the identity verification section.
- **Request phone pin**: Enter your mobile phone number and click **Text me** or **Call me**.
- **Input numeric code**: Type the 6-digit code received on your phone into the box and click **Verify code**.
- **Provide billing details**: Enter a valid credit or debit card (Visa, Mastercard, American Express, or Discover).
- **Confirm temporary hold**: Allow the system to place a $1 USD authorization hold, which drops off your statement in days.

Phase 3: Agreements and Finalization

- **Review legal terms**: Check the box to accept the **Microsoft Customer Agreement** and privacy statement.
- **Opt out of emails**: Uncheck the optional promotional marketing communications box if you prefer no sales emails.
- **Submit registration**: Click the **Sign up** button to initiate automated backend resource provisioning.
- **Wait for redirect**: Allow the loading screen to automatically forward you directly into the cloud dashboard.

Phase 4: Initial Azure Portal Actions

- **Access the portal**: Navigate directly to ://azure.com if your browser does not redirect you automatically.
- **Take the tour**: Click **Maybe later** or choose the quick-start interactive dashboard walkthrough.
- **Check account status**: Click the **Subscriptions** icon or search for it to confirm your

"Azure Free" plan status.
- **Monitor free credits**: Search for **Microsoft Cost Management + Billing** to track your remaining $200 balance.
- **Set spending limit**: Keep the default **Spending Limit** active to prevent charges if free credits run out.

If you are ready to move forward, tell me:

- What **specific service** are you building first? (e.g., Virtual Machine, Web App, Database)
- Do you need assistance setting up **billing alerts**?

I can provide the exact configuration steps for your next task!
